PROFESSIONAL SUMMARY

Final-year B.Tech student in Artificial Intelligence & Data Science with hands-on experience in deep learning, machine learning, data analysis, and Generative AI. Built an IoT-integrated 1D-CNN model achieving 93.4% accuracy for real-time cardio-pulmonary diagnostics, developed Generative AI prototypes using Groq and OpenAI APIs, and created Power BI dashboards that reduced reporting time by ~40%. Proficient in Python, TensorFlow, SQL, Power BI, and FastAPI — skilled at delivering end-to-end AI and data solutions from preprocessing to deployment.

TECHNICAL SKILLS

AI / ML: TensorFlow, Keras, Scikit-learn, 1D-CNN, Deep Learning, MFCC Feature Extraction, Model Training & Evaluation

Generative AI: Groq API, OpenAI API, Prompt Engineering, LLM Integration, Intelligent Prompt Routing

Data Analysis & BI: Power BI, Tableau, DAX, EDA, Data Wrangling, KPI Reporting, Statistical Analysis

Programming & DB: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, MySQL, HTML

Frameworks & Tools: FastAPI, Streamlit, Excel (Pivot Tables, VLOOKUP), Jupyter Notebook, VS Code, Git

INTERNSHIPS

AI Research Intern — *Evolve Robot Lab, Chennai*

Jun 2025 – Jul 2025

- Designed and deployed 3+ Generative AI prototypes using Groq and OpenAI APIs with intelligent prompt-routing logic to reduce manual query handling time.
- Built FastAPI backends with multi-model SDK integration, enabling real-time AI inference pipelines for seamless user interactions.
- Tracked and analyzed model performance metrics across 5+ prompt configurations using Python, logging response quality scores to iteratively improve output accuracy.

Data Science Intern — *T4TEQ Software Solutions*

Aug 2024

- Developed 4+ interactive Power BI dashboards to visualize KPIs across real-world datasets, enabling stakeholders to cut reporting time by ~40% through self-serve analytics.
- Automated Excel-based reporting workflows using Python (Pandas), eliminating repetitive data aggregation and saving 3+ hours per week.
- Performed end-to-end data preprocessing and trend analysis on 10,000+ row datasets, surfacing actionable insights for business decision-making.

PROJECTS

AUSCULT AI – Real-Time Cardio-Pulmonary Classification System | *Python | TensorFlow | 1D-CNN | ESP32 | MFCC*

- Collaborated in a cross-functional team to build an AI-based deep learning model for heart and lung sound classification, achieving 93.4% classification accuracy for early diagnostic support.
- Contributed to MFCC feature extraction and digital band-pass filtering (20 Hz – 1000 Hz) to prepare audio signals as model input, and supported ESP32 hardware integration for real-time data acquisition.
- Trained and evaluated the 1D-CNN model in TensorFlow/Keras, iterating on architecture and hyperparameters to maximize classification performance.

Tour Recommendation Chatbot | *Python | Groq API | FastAPI | Streamlit*

- Built an AI-powered chatbot that ingests user preferences and generates personalized travel itineraries via the Groq LLM, with a FastAPI backend achieving sub-2s average response time across 50+ destination queries.
- Deployed an interactive Streamlit frontend enabling real-time Q&A, returning structured JSON itineraries with consistent output quality.

Data Analyst Job Market Analytics Dashboard | *Power BI | Python | DAX | Data Cleaning*

- Built a 3-page interactive Power BI dashboard analyzing 500+ job listings across Job Market Overview, Skill Intelligence, and Salary Intelligence views, surfacing actionable career and hiring insights.

- Performed EDA and data cleaning using Python (Pandas), standardizing job title, location, schedule type, and salary fields to ensure analytical consistency across all views.

IPL Performance Analytics Dashboard | *Power BI | Python | DAX*

- Designed an end-to-end Power BI dashboard analyzing 5+ IPL seasons across 50,000+ ball-by-ball records, covering batting stats, bowling analysis, venue performance, and seasonal run trends.
- Performed data wrangling and cleaning in Python (Pandas), handling missing values and normalizing fields to ensure 100% data integrity before loading into Power BI.

EDUCATION

B.Tech in Artificial Intelligence and Data Science — *CARE College of Engineering, Trichy 2022 – 2026*

CGPA: 7.08 | **Relevant Coursework:** Machine Learning, Statistics for Data Science, Database Management Systems, Data Visualization, Big Data Analytics

LEADERSHIP & EXTRACURRICULAR

Sports House Captain – Blue House — *CARE College of Engineering* *2023 – 2024*

- Led a 30+ member sports house, coordinating team selection, training schedules, and event participation strategy — driving the Blue House to a Runner-Up finish on Annual Sports Day.

Secretary – Photography Club — *CARE College of Engineering* *2024 – 2025*

- Managed club operations for 20+ members, coordinating events and exhibitions, demonstrating visual storytelling and attention to detail.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Data Analytics Job Simulation — Deloitte (via Forage) | Mar–May 2026
- Artificial Intelligence Internship — Rinex, E-Cell IIT Bhubaneswar | Jul–Aug 2025 | ID: AI25-RNI0-7691
- Data Science Course Achievement — Rinex (Google for Education Partner) | Aug 2025 | ID: DS25-RNG0-7305
- Artificial Intelligence Course Achievement — Rinex (Google for Education Partner) | Aug 2025 | ID: AI25-RNG0-7691
- Generative AI Internship — Evolve Robot Lab | Jun–Jul 2025 | Issue No: RIL250749
- Workshop: Building Intelligent Applications with AI Tools — Sri Eshwar College of Engineering | Sep 2023
